

#protection

Protect your lens from damage, dirt and splashes

Description

Clear filters fulfill the desire of cinematographers for lens protection. Their function is to keep debris and other elements like sand, water e.g. away from the front lens. Furthermore, they provide the truest image, free of unwanted color shifts or other effects.

Application

Protect the sensitive front elements of the lens and/or filters against any environmental damage of your valuable equipment - not only under rough conditions.

Key Features

- Lens protection
- No color shift
- Anti-reflection coating
- Keeps exposure settings
- Maintains resolution, contrast and sharpness
