

## Classic ND: Schneider-Kreuznach's new Neutral Density Filter!

### Description

Line of 8 multi-coated grey neutral density (ND) filters. Control the amount of light hitting the sensor without any color shift, independent from aperture or shutter. Classic ND filters offer highest possible color accuracy, which allows filter stacking and minimizes your color grading time.

### Application

Choose free exposure values for aperture and/or shutter. Even under very bright light conditions, you can control the depth of field with your aperture while maintaining the correct exposure value.

## Key Features

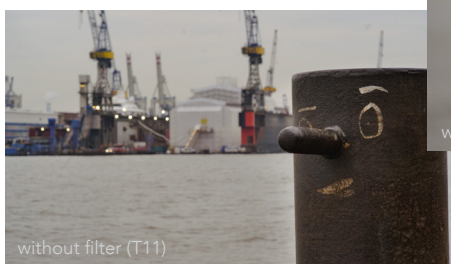

- Coated 380-780 nm (visible light to near-infrared spectrum)
- No tint, for easy color grading
- Reduces infrared pollution
- Multi-resistant, anti-reflection coating (BBAR)
- Black edge sealing to reduce straylight
- Available in 8 stops from 0.3 - 2.1 and 3.0
