

## #neutradensity #ndgrad Full Spectrum Gradient Neutral Density Filters

### Description

Available as hard or soft graduation version, which enable even and subtle compositions with wide and long lenses. RHOdium® FSND filters provide consistent filtering of the full light spectrum from 350-1.000 nm and eliminate IR pollution on all sensors without any color cast.

### Application

Balance the overall exposure of the scene to gain details in both bright and dark areas, e.g.: open sky and shadowed foreground. Choose Hard Edge for long focal length lenses and Soft Edge for short and mid-range ones.

## Key Features

- 5 color-matched stops: 0.3 - 1.5
- 2 Versions: Soft Edge and Hard Edge
- Balance overall exposure
- Eliminates IR pollution
